EDUCATION

Conestoga College **May 2022 – August 2023**
Mobile Solutions Development Waterloo, ON
Titu Maiorescu University **Oct. 2018 – July 2021**
Bachelor of Computer Science Bucharest, RO

WORK EXPERIENCE

Helios Technology Solutions **March 2026 – May 2026**
Shopify Solutions Engineer (contract) Cambridge, Hybrid, ON

- Built a custom data transformation and ingestion tool to map external client schemas into Shopify-compatible formats for automated bulk imports.
- Optimized large-scale product data ingestion workflows handling 50,000+ records with reduced processing delays and improved reliability.
- Collaborated with English- and French-speaking clients to gather technical requirements and support Shopify integration and onboarding workflows.
- Resolved integration issues related to data formatting, synchronization, and schema mismatches across client environments.

Labstat **Nov 2024 – March 2026**
Laboratory Technician Kitchener, On-site, ON
Impelement **Feb. 2024 – Feb. 2025**
Fullstack Software Developer Remote

- Designed and implemented backend and full-stack features to support client-specific workflows and business logic.
- Developed custom modules and integrations within Odoo ERP, extending platform functionality for client use cases.
- Worked with stakeholders to translate requirements into scalable technical solutions and production features.
- Contributed to system architecture decisions and iterative product development in a fast-paced startup environment.

AGFA Healthcare **Jan. 2023 – April 2023**
Java Software Developer Co-op Waterloo, On-site, ON

- Spearheaded the resolution of 10+ software defects, boosting user experience.
- Collaborated with cross-functional teams in implementing Agile software development methodologies, including PI planning and training, leading to a 25% reduction in time-to-market for software products.
- Pursued industry and company-specific knowledge, integrating best practices, tools, and technologies into developing practical software solutions that delivered tangible business outcomes.
- Revamped and optimized Java code base, resolving over 10 minor bugs and improving system stability by 15% in a high-volume transaction environment.
